

What is the Solutions Library?

The E4C Solutions Library is a living database of technologies that can improve the quality of life for those living in resource constraint. The data in the Solutions Library is curated technical and market performance information that is normalized across all products, enabling side-by-side comparison and analysis of market influences. This catalog serves to document progress of solutions and enable data-driven decisions.

Check it out online at:

Using the Solutions Library

Convenient browsing of products is available via global search or user-friendly filtering by technology category, target geographic regions, market suggested retail price and distribution to date. **Product Reports** provide detailed product information and include references and downloadable materials.

Comparing multiple products made easy. **Side by side** analysis of products is possible with normalized data across a standard set of parameters.
